Education

Vellore Institute of Technology (VIT)

B.Tech in Computer Science and Engineering with Spec. in Gaming Technology GPA: 8.41/10

October 2020 – October 2024

Bhopal, MP

Experience

RNF Technologies

Software Development Engineer

December 2025 – Present

Noida, UP

- Chartered the backend's entire foundation for Innersmith, a wellness platform, building 212+ REST APIs and conducting R&D on scalable architecture, resulting in a 30% decrease in development complexity.
- Engineered secure user authentication using JWT and Google OAuth 2.0, alongside CloudFront signed-URL media access, improving API performance by 35% with zero-downtime deployment and 99.9% API uptime across production.
- Engineered a production-ready admin panel processing 20,000+ daily actions, leveraging 15+ third-party integrations to achieve a 50% reduction in manual workload.

Heliverse Technologies

Associate Software Developer

May 2025 – October 2025

Gurgaon, Haryana

- Implemented a CMS-powered web application using Next.js and Sanity.io, enabling seamless client-side content updates without code changes and optimizing content management workflows by 70%.
- Orchestrated the construction of a resilient backend framework utilizing Hono and Prisma, integrating JWT-based authentication and RESTful APIs, which enhanced system uptime by 20%.
- Spearheaded the development and deployment of three distinct gaming applications, exceeding quality assurance benchmarks and achieving complete defect-free releases within all project timelines.

Freelance

Software Development Engineer

October 2024 – April 2025

Gurgaon, Haryana

- Automated CI/CD pipeline using GitHub Actions for a React (Vite + TypeScript) application that reduced deployment time by 75%, handled 13+ weekly deployments with zero downtime, and enabled fully automated updates on code push.
- Transformed 3 client React applications with responsive architecture and reusable components, improving rendering speed and reducing bundle size by 28%.
- Pioneered a responsive Next.js application featuring optimized state management across four key pages; this reduced data fetching speeds by 50% and reduced latency, improving response times by 30%.

Projects

StructCode Pro | ReactJs, Supabase, TypeScript | [Live](#)

May 2025

- Built interactive DSA learning platform featuring 100+ curated problem sets, interactive algorithm visualizations, integrated compiler with automated test-case validation.
- Integrated Supabase for real-time backend services, supporting smooth data synchronization across client sessions, and implemented secure authentication flows with React Hook Form and Zod.
- Accelerated application speed using Vite's module replacement and strategic code splitting, fulfilling a 90+ Lighthouse score and shrinking initial page load times by a substantial 3.2 seconds.

Json Tree Visualizer | ReactJs, TailwindCSS, TypeScript | [Live](#)

November 2024

- Effortlessly explore and customize JSON data in detailed tree structures, optimizing data analysis and visualization.
- Quickly visualize large JSON datasets in tree format, capable of handling datasets of up to 100,000 nodes with smooth rendering performance.
- Incorporated feedback from 100 beta testers, resulting in a 90% satisfaction rate for ease of use, intuitive navigation, and the ability to save up to 30% of time spent on data exploration and analysis tasks.

Technical Skills

Programming: C++, JavaScript, TypeScript

Frontend Development: React.js, Redux, Next.js, TailwindCSS, Tauri

Backend Development: Node.js, Express.js, MongoDB, Redis

DevOps & Cloud: Docker, AWS, Terraform, Ansible, Jenkins, CloudFormation

Tools & Utilities: GIT, Postman, Bash/Shell Scripting, Linux

Leadership / Extracurricular

- Service Selection Board:** Facilitated structured dialogue and debate among assessment officers, leading to the top candidate recommendation out of 30+ individuals.
- NCC Leadership:** Supervised and coordinated 50 NCC members during a state-level drill event, managing schedules and ensuring accurate drill execution.
- Hackathon Recognition:** Directed and architected a novel panic attack detection model, enabling the team to achieve finalist status among 50+ competing projects in a challenging hackathon.
