EDUCATION

Vellore Institute of Technology (VIT)

B.Tech in Computer Science and Engineering with Spec. in Gaming Technology GPA: 8.41/10

October 2020 – October 2024

Bhopal, MP

EXPERIENCE

RNF Technologies

December 2025 – Present

Software Development Engineer

Noida, UP

- Chartered the backend's entire foundation for Innersmith, a wellness platform, building **212+ REST APIs** with Node.js and Express while conducting R&D on scalable architecture, resulting in a **30% decrease in development complexity**.
- Designed secure user authentication using JWT and Google OAuth 2.0, alongside CloudFront signed-URL media access, **improving API performance by 35%** with zero-downtime deployment and **99.9% API uptime** across production.
- Delivered a production-grade admin panel handling **high-volume daily operations** and integrating multiple third-party services to streamline workflows, driving a **significant reduction in manual effort**.

Heliverse Technologies

May 2025 – October 2025

Associate Software Developer

Gurgaon, Haryana

- Implemented a CMS-powered web application using Next.js and Sanity.io, enabling seamless client-side content updates without code changes and **optimizing content management workflows by 70%**.
- Orchestrated the construction of a resilient backend framework utilizing Hono and Prisma, integrating JWT-based authentication and RESTful APIs, which **enhanced system uptime by 20%**.
- Spearheaded the development and deployment of **three distinct gaming applications**, exceeding quality assurance benchmarks and achieving **complete defect-free releases** within all project timelines.

Freelance

October 2024 – April 2025

Software Development Engineer

Gurgaon, Haryana

- Automated CI/CD pipeline using GitHub Actions for a React (Vite + TypeScript) application that **reduced deployment time by 75%**, handled 13+ weekly deployments with zero downtime, and enabled fully automated updates on code push.
- Transformed 3 client React applications with responsive architecture and reusable components, improving rendering speed and **reducing bundle size by 28%**.
- Pioneered a responsive Next.js application featuring optimized state management across four key pages; this **reduced data fetching speeds by 50%** and reduced latency, **improving response times by 30%**.

PROJECTS

Stack Decay Score | React, TypeScript, Node.js, MongoDB, Redis | [Live](#)

June 2025

- Built a dependency health monitoring dashboard that **scores 1000+ packages** from npm, PyPI, and crates.io on a 0–100 scale across security, maintenance, end-of-life, community, and licensing using OSV and GitHub Advisory vulnerability data.
- Engineered a scalable Node.js and Express backend with MongoDB and Redis/BullMQ queues to process concurrent scans, **cutting repeat analysis time by 60%** via cached results and GitHub webhook-triggered automatic re-scans.
- Developed interactive React dashboards with TanStack Query and Recharts for trend analysis and dependency-tree visualization, adding PDF/CSV export and weekly digest emails to **speed up dependency triage by 45%**.

Dukaan Saathi | Next.js, TypeScript, Express, MongoDB, Gemini AI | [Live](#)

March 2025

- Built an AI-powered inventory platform for kirana stores that forecasts demand from historical sales using Google Gemini AI, **reducing stockouts by 40%** and automating reorder quantity and deadline recommendations.
- Architected a secure Express and MongoDB backend with JWT authentication, Razorpay payments, CSV bulk import, and Node-cron low-stock alerts, **supporting multi-store management** from a single unified dashboard.
- Piloted the platform across **10+ kirana stores** in real-world testing, earning strong positive feedback as shop owners quickly learned to operate the entire application with ease in Hindi, significantly improving accessibility and user adoption.

TECHNICAL SKILLS

Programming: C++, JavaScript, TypeScript

Frontend Development: React.js, Redux, Next.js, TailwindCSS, Tauri

Backend Development: Node.js, Express.js, MongoDB, Redis, Socket.IO

DevOps & Cloud: Docker, AWS, Terraform, Ansible, Jenkins, CloudFormation

Tools & Utilities: GIT, Postman, Bash/Shell Scripting, Linux

LEADERSHIP / EXTRACURRICULAR

- Service Selection Board:** Facilitated structured dialogue and debate among assessment officers, leading to the **top candidate recommendation out of 30+ individuals**.
- NCC Leadership:** Supervised and coordinated **50 NCC members** during a state-level drill event, managing schedules and ensuring accurate drill execution.
- Hackathon Recognition:** Directed and architected a novel panic attack detection model, enabling the team to achieve **finalist status among 50+ competing projects** in a challenging hackathon.
