SUMMARY

Software Engineer with **1+ years** of experience taking web applications from initial architecture through production deployment. Focused on writing maintainable, reliable code and on delivering features that create measurable impact for users.

EDUCATION

Vellore Institute of Technology (VIT)

B.Tech in Computer Science and Engineering with Spec. in Gaming Technology **GPA: 8.41/10**

October 2020 – October 2024

Bhopal, MP

EXPERIENCE

RNF Technologies

Software Development Engineer

December 2025 – July 2026

Noida, UP

- Architected the backend foundation for Innersmith, a wellness platform, delivering **100+ REST APIs** with **Node.js**, **Express.js**, and **MongoDB**, and setting the service structure, validation, and error-handling standards used across the codebase.
- Implemented secure authentication with **JWT** and **Google OAuth 2.0** plus **AWS CloudFront** signed-URL media delivery, supporting zero-downtime deployments and **99.9% API uptime** in production.
- Modeled **MongoDB** collections and **Mongoose** schemas for the platform's core entities, defining relationships and query patterns that kept the data layer consistent as features expanded.
- Documented the full **REST API** surface in **Postman** collections with request and response examples, enabling frontend and QA teams to integrate and test without backend support.
- Delivered a production-grade **React** admin panel with role-based access control, integrating third-party services to cut manual effort by **40%**; partnered with product and QA in **Agile** sprints and reviewed peer pull requests.

Heliverse Technologies

Associate Software Developer

May 2025 – October 2025

Gurgaon, Haryana

- Integrated **Next.js** with **Sanity.io** CMS, defining reusable content schemas that let content teams make **500+ direct content edits** and publish updates without developer involvement in routine releases.
- Developed a resilient backend using **Hono** and **Prisma ORM** with **JWT**-based authentication, **RESTful APIs**, and type-safe database access, improving overall system reliability and simplifying client integration.
- Shipped **three distinct gaming applications** end to end, meeting QA benchmarks and achieving defect-free releases within all project timelines.

Freelance

Software Development Engineer

October 2024 – April 2025

Gurgaon, Haryana

- Automated **CI/CD** with **GitHub Actions** for a **React (Vite + TypeScript)** application, reducing deployment time by **70%** across **5+ weekly deployments** with zero downtime.
- Rebuilt **3 client React applications** with mobile-first responsive layouts and a shared reusable component library, applying code splitting and lazy loading to improve rendering speed and cut bundle size by **28%**.
- Launched a responsive **Next.js** application with optimized state management across **four key pages**, restructuring data fetching to improve response times by **30%**.

PROJECTS

Stack Decay Score | [React](#) [TypeScript](#) [Node.js](#) [MongoDB](#) [Redis](#) | [Live](#)

June 2026

- Built a dependency health dashboard scoring **1000+ packages** from **npm**, **PyPI**, and **crates.io** on a **0–100 scale** across security, maintenance, end-of-life, community, and licensing using **OSV** and **GitHub Advisory** data.
- Engineered a scalable **Express/Node.js** backend with **MongoDB** and **Redis/BullMQ** queues for concurrent scans, cutting repeat analysis time by **60%** via caching and webhook-triggered re-scans, with **React** and **TanStack Query** dashboards.

Dukaan Saathi | [Next.js](#) [TypeScript](#) [Express](#) [MongoDB](#) [Gemini AI](#) | [Live](#)

March 2026

- Created an **AI-powered** inventory platform for kirana stores that forecasts demand from historical sales using **Google Gemini AI** and recommends reorder quantities and restock deadlines.
- Designed a secure **MongoDB**-backed **Express** service with **JWT** auth, **Razorpay** payments, CSV bulk import, and **Node-cron** low-stock alerts; piloted across **10+ stores** with a **Hindi**-language UI driving rapid adoption.

TECHNICAL SKILLS

Programming: C++, JavaScript (ES6+), TypeScript

Frontend Development: React.js, Redux, Next.js, TailwindCSS, Tauri

Backend Development: Node.js, Express.js, MongoDB, Redis, Socket.IO

DevOps & Cloud: Docker, AWS, Terraform, Ansible, Jenkins, CloudFormation

Tools & Utilities: GIT, Postman, Bash/Shell Scripting, Linux, Claude Code

LEADERSHIP / EXTRACURRICULAR

- Hackathon Recognition:** Led the design of a novel panic attack detection model, taking the team to finalist status among **50+ competing projects**.
- Service Selection Board:** Facilitated structured dialogue and debate among assessment officers, earning the top candidate recommendation among **30+ individuals**.
